

SA-Evo

The SA-Evo is the newest member of the MHM-family and your perfect choice when space is narrow. With an overall diameter of only 3,7m of the 8 color-model the SA-Evo still provides the well known MHM-quality.

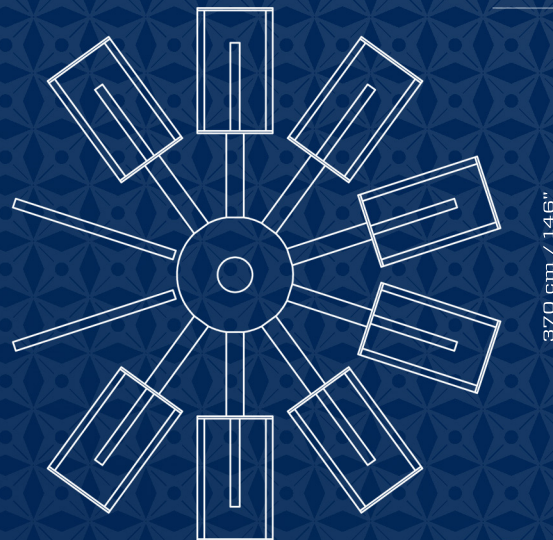

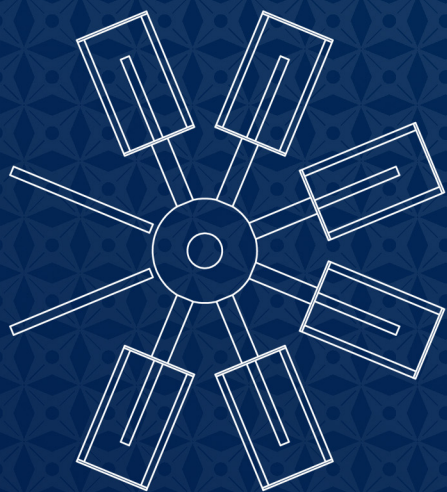

Its smooth running indexer and the solid registration system compared with the small footprint makes it an ideal entry-level model in the world of automatic printing presses. For user friendly operation the SA-Evo is also equipped with the latest „m-touch pro“ operating system with tablet interface.

SA-Evo - because size does matter!

unique. individual. intelligent.
