

X-Type plus

Available in 6, 8, 10 and 12 colour models and with an overall diameter of just over 370 cm / 12 ft (8 station model), the X-Type plus comes with many of the features of the larger MHM machines but in a much smaller and compact footprint.

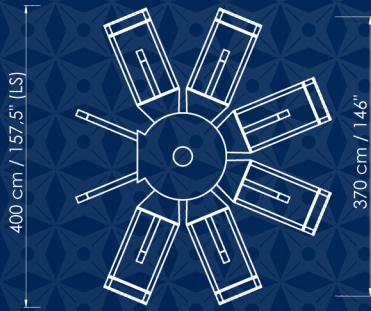

Our familiar and world renowned high quality printing heads come as standard, making the X-Type plus instantly recognizable to the operator, minimising training and maintaining perfect compatibility. For intuitive user-friendly operation, the X-Type plus comes equipped with the latest m-touch pro operating system with tablet interface. In addition, every printing station has its own keypad for fast and easy adjustments during set-up.

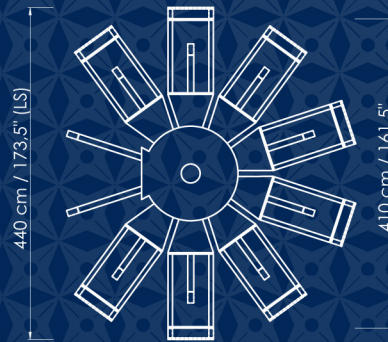

unique. individual. intelligent.
