

make it scalable

...the rocket for your supersonic value production workflow

Smake® Satellite – Exceptional possibilities for textile embroideries and textile printers

Smake[®] Satellite is a combination of the Smake[®] *eShop* and the Smake[®] *Value Production Workflow*. Your production will be designed and optimized in a way that we refer to as >Value Production Workflow<. With Smake[®] Satellite you will be optimally positioned and successful in the future. For embroidery and DTG printing.

About Smake GmbH

Smake GmbH combines many years of manufacturing experience in mechanical engineering with IT know-how and is the innovation leader for integrated >Mass Customization< eShop concepts in which the complete production workflow for embroidery and print jobs (Smake® VPW – Value Production Workflow) can be tethered modularly step by step.

Smake[®] Satellite

Smake[®] Satellite is a closed online-based eShop and production tool. Simply stunning! From professionals for professionals or the ones to-be, who have recognized the signs of the times.

No matter if one or multiple pieces – through the Smake[®] Value Production Workflow your production is unerringly prepared and coordinated for all eventualities. You and your employees will be excited about a stress-free, accurate workflow- even at peak hours.

Additionally the size and diversification of your production facility is not relevant for Smake[®]. If it's a small 'XS' production (e.g. with only one machine for embroidery or print) or big 'XXL' production (e.g. with multiple machines for embroidery-,print- and/or labeling) doesn't matter for the Smake[®] system – because it is easily scalable from 'XS' to 'XXL': the perfect process is determinative in this case. If you like to start with one machine and a shop and try to upgrade it to any size – no problem with Smake[®]!

Smake Wallboard

Smake VPW wallboard offers a maximum of transparency and added value

With the Smake Wallboard you have all your production processes visually under control. From incoming orders, shipping status with production times, orders in your production units, extensive statistics etc .On request, all the information of your production at a glance.

An invaluable added value, you will be delighted – promised!

With Smake[®] into the future – Lean Production = Value Production Workflow

We thought >production < in a different way - how a future production should be set up to handle single units, small quantities and personalized requirements of the B2B and B2C-sector.

So that you will be optimally positioned for the future to attain a good and reasonable margin.

Easy order process and accurate production in one Smake® eShop is a specialty in itself. However it is topped by the perfectionist production process! The production lines are uniquely divided in units. You thereby benefit from our long time experience in production of textile finishing (embroidery, print, laser, sewing, etc.) and additionally from our deep and broad IT know-how. The combination of both areas makes Smake[®] so unique and superior.

Looking at the overall process of order transactions The orders automatically come in from the eShop (initiated by the customer). Further into the production every scan means security and control in the process. It prevents potential mistakes and helps to save enormous time in the overall process.

Every scan process is saved in the article history. The smallest mistakes are being avoided-to the satisfaction of your customer and therefore your satisfaction. For you and your future: Value Production Workflow!

Smake® Satellite Order- and Production process

Smake® Produktion at Industry 4.0 Standard (10 minutes from incoming orders to shipping) Smake[®] eShop & Smake[®] VPW → Value Production Workflow

Smake[®] Satellite supports these and other brands:
